WHY CHOOSE \$VOTE COIN

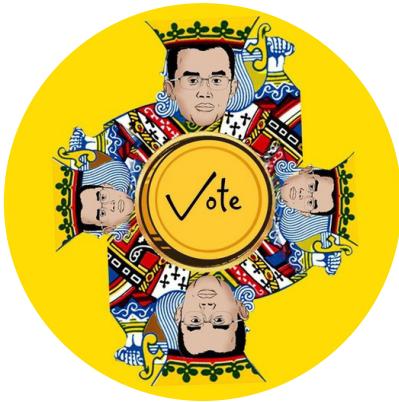

\$Vote is a community focused meme project. This project has the mission of giving the community a choice between Binance and Sec. Who will be the winner in this war? We created this project for the community to participate in voting and get a reward from 5% of the trading fees that will be added as a reward for the right choice party. This project will have great support from Cz and the world crypto community because we also vote for the winning crypto. Let's get this project to \$1B Mcap to show the world the power of the crypto community.

 5% of each trade will be divided among the winners who participate in the vote event every day.

 \$Vote coin audited by leading company

 Dev does not hold tokens

 10% Tax (2% Reward Holders, 3% Marketing, 5% Rewards for Vote Event)

How to play ?

Making money is quite easy

You need to hold a certain amount of \$Vote tokens, then participate in voting to choose the winner according to your preference. The party that receives more votes than the entire prize will be divided equally among the voters. In each voting round, each wallet can only participate once. Each vote counts for 1 point, not based on the number of tokens that person holds.
